

Future Combustion Research to Mitigate Carbon Emissions

Topical leads should address the following questions during discussion:

- What is possible with the combustion research?
- What is needed to achieve the desired outcomes?
- How do we do it? Consider:
 - Balance between fundamental and applied research
 - Alignment among academia, industry, and government efforts
 - Research innovation, out of box ideas, ideas beyond disciplinary boundaries
 - Education and outreach

Instructions for all Participants

- Workshop is divided into four topical sessions, and one summary session
- Each topical session will have two parallel break-out sessions
- Each person should participate actively in at least two topical sessions
- Active participants should occupy the front rows of break-out sessions
- All participants are expected to attend sessions and contribute to the discussions
- All participants are expected to provide written comments at the end of the workshop
